

OLYMPIC EDUCATION

1. The champion in [sfaivoliias] Irene Terzogloy in our school

In the past few years we observe that with particular intensity the athletes claim the glory and the trophies that arise after a big victory. In order to accomplish that however, they exceed the very high records and gain few athletes they resort in the use of prohibited substances (Doping), in order to increase their natural power that will lead them to the victory sacrificing thus, not only their athletic career, but also life itself. And if we also judge from the conclusions of research that were carried out in the Olympic Fights of Atlas, where more than half athletes answered positively in the question if they would take certain prohibited substances in order to gain medals for 5years, knowing that afterwards they will have serious health problems or even death, for which values of sports we can speak. Could sometime in the future "trading" championship become pure sports for all or this simply romanticism?

Therefore, on the occasion of these thoughts and in the frames of the subject of Olympic Education, the students of the 6th grade with the Olympic Education teacher, Mrs Bodeniotoy Pigi called Mrs Irene Terzogloy for a discussion.

Our champion spoke to them with simple words and she answered to all questions with joy and did not deny signing autographs at the end of interview.
