

Traffic Education

1. Safely I Get Around

The students of D1 and B class of the all-day school, with their schoolteachers Filippidis Antonis and Toutziari Antonia, participated during the school year 2008-09 in the program of traffic education titled: "Safely I Get Around"

Objectives

- ❖ To learn to get around with safety
- ❖ To learn the traffic signs
- ❖ To be able to find solutions in real conditions
- ❖ To be able to intervene and give advice to adults who do not have the right behavior while on the road.

Evaluation

- ❖ The activities were very interesting and amusing. The children were completely informed about the safe way of getting around; about the dangers they might face on the road either as pedestrians or in a vehicle. They realised that there is a lot of traffic around the school and that is why the lack of a school warden is a problem that should be solved. They came to the conclusion that in the future they will intervene in their parents' erroneous behaviors in order to decrease road accidents and ensure the safety of the citizens in the street.

2. "I Learn To Walk Responsibly In The Street- The Street And I"

The children of the 5th grade participated in a program about road safety and traffic education

Activities:

Tour with the students in the streets of our region in order to learn the signals and the "traps" that many times the streets hide. We worked with the students in teams on the exercise book that was supplied to us by "RENAULT".

Saw the DVD "The Adventures Of Wous" as well as the DVD from the teacher seminar titled: "I Learn To Walk Responsibly In The Street- The Street And I" having as the main speaker the racing driver Mr. Iaberi. Discussion with the students followed on their reflections and questions that arouse after completion the program.
